

## Roadmap

### Milestone: **Solution Conceptualized**

Due in **33 minutes** (2012-05-25T12:00:00+02:00)

Total number of tickets: 2 - closed: 1 - active: 1

This Milestone defines the point at which all components of the final system have been evaluated and the track is set to start implementing (coding) the planned features.

### Milestone: **Core Features Implemented**

Due in **3 weeks** (2012-06-15T18:00:00+02:00)

Total number of tickets: 1 - closed: 0 - active: 1

At this point the core functionality, i.e. "RNA-seq Data Analysis", as described in the Software Requirement Specification (Version 0.1) in Chapter 3.2, is fully implemented.

Other features do need not be implemented and the user interface is not required to appear in the final layout yet.

### Milestone: **Version 1.0**

Due in **4 weeks** (2012-06-22T18:00:00+02:00)

Total number of tickets: 2 - closed: 0 - active: 2

At this point the Software is completely finished.

- All functionality is implemented
- The user interface has its final layout
- The software has been thoroughly tested (code coverage > 80%)

### Milestone: **Thesis Finished**

Due in **6 weeks** (2012-07-06T18:00:00+02:00)

At this point the thesis paper will be in its final form. 99% of the text is written and a PDF version of the paper is made available online.

Invitations to review the language and structure of the document are prepared the day before and sent out -- to Mr. Lipps, Mr. Brown, Mrs. Hardyment, Mr. Xander and Mr. Straumann -- as the paper becomes available.

### Milestone: **Version 1.1**

Due in **7 weeks** (2012-07-13T12:00:00+02:00)

Total number of tickets: 1 - closed: 0 - active: 1

At this point, the thesis paper along with the software must be submitted to the FHNW in Muttensz.

The paper as well as the software will have reached version 1.1, i.e. any bugs found in the initial releases have been identified and fixed.
